The conference is designed to meet the needs of investigators and supervisors tasked with the investigation of homicides, suicides and unnatural deaths. Topics of discussion include: interview and interrogation, cold case investigation, behavioral analysis, serial homicides, crime scene reconstruction, advanced technological techniques, forensic anthropology, genetic geneology, as well as major case studies.

Attendees will have ample opportunity to discuss their own cases with investigators from across the United States and several foreign nations. We have designed the conference to provide social activities which facilitate networking and small group discussions between the attendees.
